## Company Information

### About Us

Guangdong Future Workplace Furniture Industrial Co. Ltd., founded in 1999, is a set design, production, sales and service as a whole, designed for hotels, apartments, villas, club service furniture suppliers. Hotel furniture as the core pillar industries, relying on the favorable region of the Pearl River Delta, and more adjacent to Hong Kong and Macao as its operating hub for the international market. After 26 years of careful management, Future Workplace has become the leading player in China's leading hotel furniture industry.

## Company Information

Future Workplace has always adhered to the business philosophy of striving for excellence, constantly refreshing the "Future Workplace" brand with quality and service. Committed to providing comprehensive hotel space solutions for international brand hotel groups, Future Workplace has won a broad market in the domestic and international hotel furniture industry and has gained the trust of international renowned brand hotel investors.

## Future Workplace's Strong Design Deeping Team

Our design team has been involved in numerous in-depth design projects for high-end hotels, efficiently transforming customer needs into detailed furniture production drawings. This ensures a seamless alignment between the customized furniture production and the hotel's design philosophy. With years of practical experience, our design team is capable of meeting various design challenges, creating furniture pieces that are both visually appealing and highly functional.

## Workshop 6

## Preparation Workshop

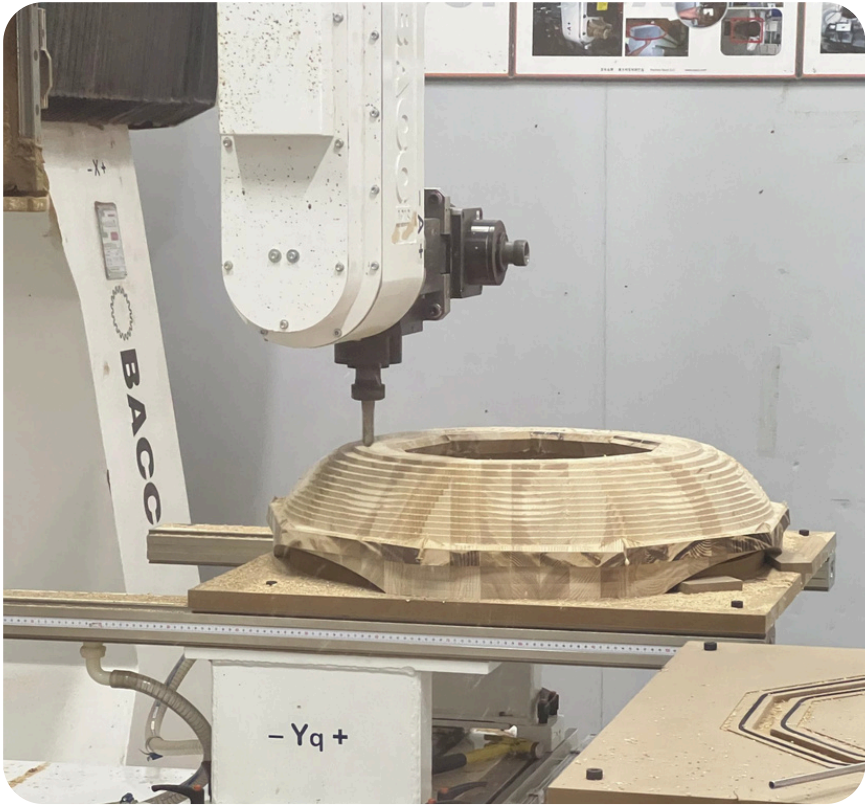

Planer-sander  
solid wood planing machine

To make the solid wood surface smooth and flat

Shen Dia bending machine

To cut straight lumber into curved shapes for the manufacture of bent furniture components

Bacci Italian Bacci 5-axis machine

Imported from Italy, it is a high-end CNC machine tool designed specifically for complex surface machining, characterized by high efficiency and high precision

## 3-axis machine

Turning straight solid wood into cylindrical shapes, commonly used for making chair legs

# Machining Workshop

double-head tenoner

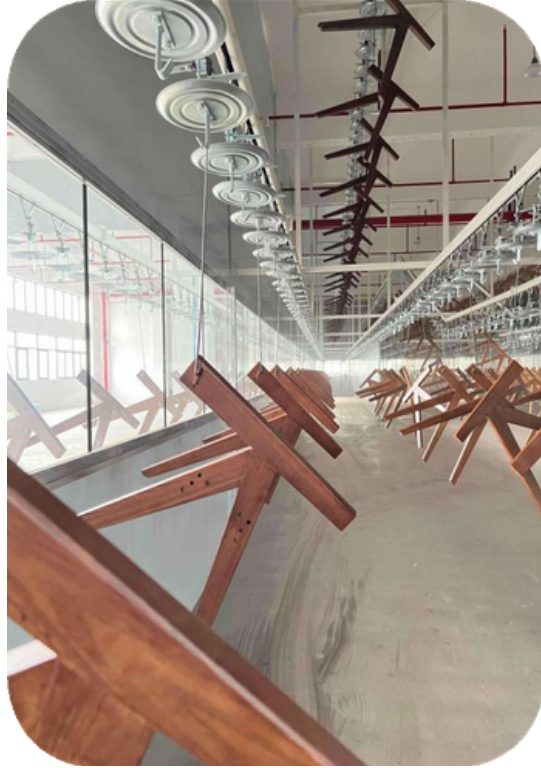

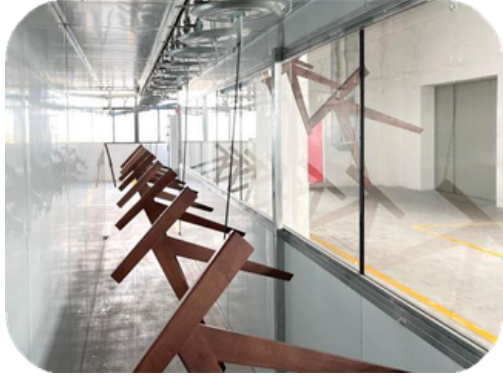

single-head tenoner

Edging machine

Due to the presence of three sanding belts with grits of 100, 150, and 240, the performance is three times that of a standard sanding machine.

# Automated Spray Painting Workshop

2000

There are 2000 hooks

3

It takes 3 hours for one round

629

The total length is 629 meters

The fully assembled products (primer and topcoat) are sprayed on the line, but touch-up painting must be done offline. One round can accommodate 500 chairs.
