SAFETY, QUALITY AND ENVIRONMENT POLICY

BRADO Management describes the contents of its Policy for Safety, Quality, Environment and FSC and encourages the Head of the Management System to disseminate it appropriately outside the company to new suppliers and customers, and within the company structure, by informing and specifically training personnel. Management has in its company policy defined the strategic action aimed at continually improving its QMS and EHSMS, intending to provide customers with products and services according to the highest quality standards on the market and to maintain excellent company management, while protecting the safety and health of workers and safeguarding the environment; all this through the following Mission values and actions:

PARTICIPATION

Placing people at the centre of every action, within the organisation and in relations with stakeholders, valuing them and ensuring respect for the principles of equity, diversity and inclusion.
Implementing all binding provisions on the protection of child labour, associations, exploitation and discrimination. Always acting with integrity and legality, honouring commitments.
Ensuring effective participation in programmes for process and product innovation, environmental protection and occupational health and safety, through information, training and awareness-raising for all personnel involved.

INNOVATION

Contributing to the company's progress by engaging in continual research that produces quality products and innovative solutions in harmony with the ecosystem, ensuring the well-being of future generations, paying attention to environmental aspects, consumption of natural resources, product life cycle, and maintaining our position of leadership in the industry and segment in which we operate.
Through the BRADO FACTORY structure, providing customers with all our experience and expertise in identifying the most appropriate solutions for their product development needs, responding to requests as promptly and flexibly as possible, optimising the quality/price ratio of the product and service designed and supplied, and placing ourselves in relation to the customer not only as a simple supplier but as an important partner capable of providing active support in the development and improvement of the customer's own products and processes.

QUALITY, ENVIRONMENT, SAFETY AND FSC

Ensuring an excellent level of product quality and production processes.
Periodically reviewing the company's Policy, objectives and programmes concerning the Quality, Environment, Occupational Health and Safety Management System and the FSC system, in compliance with existing procedures, in the interest of stakeholders, promoting the most appropriate initiatives for improving its organisation and adapting to the external context in which the company operates.
Ensuring the availability of the necessary resources, to achieve the objectives of continuously implementing a company management system integrating Quality, Environment, Occupational Health and Safety aspects.
Guaranteeing the company's commitment to environmental protection by preventing pollution, developing the use of sustainable resources, and minimising impact on the ecosystems in the local area.
Prioritising preventive actions and internal investigations to protect workers' health and safety, so as to significantly **REDUCE** the likelihood of **ACCIDENTS, INJURIES** or other non-conformities.
